Tips for Donating

To make it simple, be respectful! Imagine you have just summoned the greatest amount of courage available, and imagine the process of learning to accept help from others for the very basic items.

Please choose to donate items that are in good condition. If the item is broken or not relevant please don't donate it. Also please do not donate clothing items with stains and tears. Please do not donate unusable electronics or broken down appliances. All cleaners, beauty products, baby and personal hygiene products must be new and unopened.

Remember, donating is about respect. Try to only donate items that you think will help a woman and her family build their new and positive life.

Thank you for your support!
